EDUCATION

University of the Philippines Los Baños

2023 - Present

BS Computer Science - University Scholar

RELEVANT EXPERIENCE

Freelance Web Designer & Developer | Self-Employed

January 2026 – Present

- **Delivered 5+ client web projects** across portfolio, business, and landing page formats, translating client goals into responsive websites through independent design, development, and deployment.
- **Improved website structure and user flows** through redesign initiatives, strengthening service presentation, simplifying navigation, and increasing the visibility of key conversion points.

Web Designer - FaithAI & Digital Workforce | Competition (Winner)

November 2025 - December 2025

- **Shipped 2 high-fidelity Figma prototypes** – covering full user flows and interaction design specs – within a 6-week competition window, **using AI-assisted ideation tools to compress the wireframe-to-prototype cycle.**
- **Applied visual hierarchy principles and information architecture** across the landing site to guide users through a multi-step service decision flow, structuring CTA placement to minimize cognitive load and reduce drop-off.

Web Designer - SmartChatAI | Competition (3rd Runner Up)

October 2025 - October 2025

- **Modernized the SaaS landing page** to better communicate product value and support business goals, balancing visual hierarchy with content clarity.
- **Implemented a structured interface** to guide potential clients through features, benefits, and calls-to-action intuitively.

UX Researcher & Designer - AMIS Student Portal Redesign

March 2025 - April 2025

- **Reduced average task completion time by 75% (from ~25s to 6.2s)** by conducting full-cycle user research, redesigning user flows, and applying interaction design improvements validated across 10 moderated usability sessions.
- **Achieved a 93.2 SUS score** (above the industry "Excellent" threshold of 90), **100% task success rate**, and **0.1 misclick rate** by iterating the prototype through think-aloud testing and task-based metrics with 10 participants.
- **Surfaced 5 critical friction points** through 10-participant moderated usability tests using think-aloud protocols and SUS scoring, each finding directly mapped to a specific interaction design change in the final redesign.

PROJECTS

UI/UX Lead & Frontend Developer - SPACES | Los Baños

February 2026 - May 2026

- **Led a 4-member UI/UX team within a 20-person Agile development team**, defining the product's branding, design system, and core user experience while collaborating across sprint planning, design reviews, and implementation cycles.
- Designed the platform's landing page and key user interfaces, contributing to SPACES being recognized as the **Best UI/UX Project among 10 third-year Software Engineering sections** during final project evaluations.

UI/UX & Frontend Developer - Travel Planning App | Los Baños

March 2025 - May 2025

- Built a **cross-platform travel planner in Flutter and Firebase** with real-time itinerary tracking and scalable state management.
- Designed the end-to-end user experience in Figma, translating research insights into a functional MVP awarded **Best Project/ UIUX among six groups** for UX clarity and technical polish.

Full-stack Developer - School Organization Management System | Los Baños

March 2025 - May 2025

- Built a full-stack web app for student organization management using React, Node.js, and **MariaDB with Sequelize ORM.**
- Designed a cohesive UI system with Tailwind CSS, ensuring functional consistency across workflows; awarded **Best GUI Design** for interface clarity and usability.
