

Carl Joshua Coloma *AI Engineer*

✉ carljoshuamcoloma@gmail.com | ☎ +639174504450 | [in](#) LinkedIn | [GitHub](#) | [Portfolio](#)

TECHNICAL SKILLS

Programming & Frameworks: Python, JavaScript, React.js, Streamlit, Flask

Machine Learning & AI: Scikit-learn, TensorFlow, PyTorch, NLP

Computer Vision: OpenCV, MediaPipe, YOLOv8

Automation & AI Workflows: n8n

Databases & Tools: MySQL, Jupyter, Git, Kaggle, VSCode, Cursor

PROFESSIONAL EXPERIENCE

AI QA Intern, SoFi AI Tech Solutions Inc. [✉](#)

April 2026 – Present

- Conduct evaluation of AI chatbot systems focusing on response accuracy, contextual consistency, and behavioral reliability.
- Design structured test cases for conversational AI to assess prompt handling, edge cases, and model failure scenarios.
- Analyze chatbot outputs to identify issues in reasoning, instruction-following, and response quality for system improvement.
- Collaborate with developers to refine AI behavior and improve overall model performance and user interaction quality.

AI Engineer Intern, Lamina Studios [✉](#)

December 2025 – April 2026

- Built AI models combining computer vision and sensor data to identify risky behaviors and improve operational safety.
- Developed route optimization solutions using mapping APIs and graph algorithms to enhance delivery efficiency.
- Designed a web application integrating predictive analytics and workflow automation using n8n for system processes.
- Built real-time data processing pipelines and simulations to validate model performance.

PROJECTS

Powerlift: Precision Pose Estimation for Powerlifting Performance

July 2025

Metrics [✉](#), *Full Stack-Developer, Document Specialist*

- Developed a computer vision mobile application that tracks 17 key points using pose estimation to analyze powerlifting form in real time.
- Provided instant visual feedback and performance metrics, improving training accuracy for 25+ users.

AI Engineering Roadmap (Open Project) [✉](#), *Author/Developer*

Ongoing

- Designed a structured AI engineering roadmap covering Python, data analysis, machine learning, deep learning, NLP, and deployment.
- Continuously expanded with mini-projects and hands-on exercises to demonstrate practical AI development workflows.

AI Resume Analyzer [✉](#), *Developer*

February 2026

- Built a Streamlit web application that automatically analyzes 100+ resumes, extracting skills and computing candidate-job match scores.
- Implemented NLP-based entity extraction and skill ranking algorithms to improve resume-job matching.

AI Document Summarizer [✉](#), *Developer*

March 2026

- Built a Streamlit web application that extracts and summarizes long PDF documents (100+ pages) using NLP and transformer-based models.
- Implemented PDF text extraction, chunking strategy, and Hugging Face transformer pipelines to generate coherent abstractive summaries.

CERTIFICATES

AI Engineer [✉](#) | IT Specialist - Python [✉](#) | Python Essentials [✉](#) | Artificial Intelligence Fundamentals [✉](#) |

Introduction to Data Science [✉](#) | Introduction to Modern AI [✉](#) | Introduction to MCP [✉](#)

AWARDS

Overall Best Thesis - Computer Vision Category [✉](#)

December 2025

EDUCATION

Bachelor of Science in Computer Science with Specialization in Software Engineering, FEU Institute of Technology

2022 – 2026 | P. Paredes St., Sampaloc Manila
