Education

University of British Columbia

Anticipated Graduation: May 2027

Bachelor in Computer Science and Business

Vancouver, BC

- **Scholarships:** Outstanding International Student, Sauder International Student Scholarship Recipient (\$120K)
- **Relevant Coursework:** Relational Databases, Object Oriented Programming, Advanced Data Structures & Algorithm, Computer Systems, Applied Machine Learning, Information Systems, Business Communications
- **Activities:** Perplexity Campus Ambassador, Events Director at UBC Product Management Club, RBC WTAP Mentee

Work Experience

Software Engineering Intern

May 2026 – Current

Royal Bank of Canada

Vancouver, BC

- Designed and implemented workflow automation solutions using Power Automate, reducing manual administrative effort and enabling non-technical teams to manage processes independently.
- Developed self-service reporting dashboards that transformed spreadsheet-based data into interactive visualizations.

Product Management Intern

May 2025 – December 2025

Henry Schein One Canada

Vancouver, BC

- Drove product discovery for a new external web application, converting user research into structured Jira stories and acceptance criteria to support a solution projected to reduce regulated data collection time by 50%.
- Managed the cross-functional rollout of an AI-powered support chatbot (AWS Kendra, RAG), aligning engineering and support teams to drive a projected 60% reduction in ticket resolution time and \$2M ARR impact.

Product Growth Intern

May 2024 – August 2024

Zetl (Fintech Startup)

Singapore

- Drove a 25% increase in engagement by building performance dashboards that analyzes user segmentation and access behaviors, identifying usage patterns and informing feature decisions.
- Revamped partner decks to sharpen value proposition, accelerating partner alignment and shortening sales cycles.

Projects

What Was That | nwHacks | *Expo, Javascript, Typescript, Xcode* | [Github](#)

January 2026

- Built a full-stack (React Native, Node.js/Express) real-time audio monitoring platform that detects safety-critical events and autonomously triggers push, SMS, and voice alerts to enable immediate intervention.

Kaya Learning | SheBuilds Lovable | *Lovable, Supabase, Typescript* | [Github](#)

December 2025

- Built a multi-tenant, offline-first education platform using Supabase with device-scoped local storage, implementing tablet-level data isolation, local caching, and deferred sync to ensure resilient shared-tablet deployments.

Sudo | Product Challenge | 1st Place | [Figma](#)

November 2025

- Designed an AI-driven VC operating system that replaced ad-hoc spreadsheets and CRM workflows with structured scoring logic, AI-assisted insight synthesis, and standardized investment evaluation frameworks.

Leadership

Portfolio Management Associate

April 2024 – Present

Front Row Ventures

Vancouver, BC

- Drove founder enablement at Canada's leading student-run, university-focused VC (\$10M pan-Canadian fund) by supporting portfolio growth through product tools and platform innovation.
- Evaluated early-stage startups, conducting competitive analysis and technical diligence to inform investment decisions.

Events Lead

April 2024 – Present

UBC BizTech

Vancouver, BC

- Directed 8 large-scale events for UBC's largest technology club (900+ attendees), coordinating cross-functional teams and delivering consistently high-rated experiences and community growth.
- Executed HelloHacks and ProductX, beginner and advanced-level hackathons attended by over 200 participants.

Skills:

Tools: AWS, Jira, Confluence, Pendo, Tableau, Figma, Microsoft Office, Google Suite, Postman, Github

Languages: CSS, JavaScript, TypeScript, Java, C, C++, Python, React, SQL

Product Skills: Agile and scrum methodologies, user research, stakeholder alignment, data synthesis, rapid prototyping
