PROFESSIONAL SUMMARY

I am a third-year BSIT student and aspiring Software Developer with a strong focus on building scalable web applications and cloud-native solutions. I have practical experience developing with React and TypeScript, complemented by a solid understanding of implementing CI/CD pipelines and managing cost-effective deployments on Google Cloud Platform (GCP). My technical background includes designing RESTful APIs, handling complex data structures, and optimizing backend logic to ensure secure and efficient system performance. I am eager to apply my skills in modern development workflows and cloud architecture to contribute to impactful software projects.

EDUCATION

Quezon City University | Quezon City, Philippines

Bachelor of Science in Information Technology (BSIT) | Expected Graduation: 2027

- *System Architecture, Database Management, Software Engineering, Web Development.*

TECHNICAL PROJECTS

Clarity (Personal Cloud Project) | *Full Stack Developer* | Mar 2026 – Present

Live Link - <https://clarity-journal-psi.vercel.app/>

- Architected a cloud-based application focused on system integration, deploying backend services to a Google Cloud Platform (GCP) environment.
- Established reliable connectivity utilizing HTTP and REST protocols to integrate external APIs and manage data payloads.
- Created comprehensive technical specifications and evaluated system performance under scaled frontend requests.

Pharmacy Management System Migration | *Full Stack Developer* | Jan 2026 – Present

- Engaged in full-stack development to migrate a legacy web system to a modern application using Electron.
- Integrated a Node.js and MongoDB backend, managing asynchronous data pipelines to ensure seamless, real-time JSON data flow.
- Participated in code reviews, debugging, and user acceptance testing (UAT) to uphold high software quality and troubleshoot deployment issues.

Guard-Side Monitoring & QR Notification System | *Project Manager & System Analyst* | Aug 2025 – Dec 2025

- Engaged directly with academy stakeholders to obtain system requirements, ensuring the completeness and accuracy of technical documentation.
- Delivered regular project status updates to clients and peer developers, maintaining strong stakeholder relations throughout the software development lifecycle.
- Mapped business processes to system capabilities and defined logical rules based on strict client requirements for real-time notification endpoints.

University Compass (University Finder Web App) | *Full Stack Developer* | Aug 2025 – Dec 2025

- Developed a dynamic web application utilizing **ASP.NET MVC** and **C#**, applying Object-Oriented Programming (OOP) principles to ensure secure and maintainable backend code.
- Architected a relational database using **Microsoft SQL Server**, writing and optimizing complex SQL queries to efficiently store and retrieve institutional data.

LEADERSHIP & INVOLVEMENT

DataCamp | DataCamp Scholar | Apr 2026 – Present

- Advancing technical competencies in database development, Python scripting, and system design through intensive, structured coursework.

Google Developer Ecosystem Communities | Jun 2026 – Present

- Part of a curated learning cohort focused on developing practical, hands-on skills within the Google Cloud and developer ecosystem.

TECHNICAL SKILLS

- **Backend & Databases:** C#, ASP.NET MVC, Microsoft SQL Server, Node.js, MongoDB, REST/JSON APIs
- **Cloud & Architecture:** Google Cloud Platform (GCP), System Design, Asynchronous Data Pipelines
- **Frontend:** React.js, JavaScript, HTML, CSS, Electron
- **Tools & Practices:** Git/Version Control, Postman, CI/CD concepts, Arch Linux (Custom environment configuration)
